Job Opportunity - Cache Developer - Redditch

Opportunities exists for keen Caché developers to join our established software house in Redditch.

The Company

M-Tech Computers Ltd (www.amo.co.uk) is a successful independent software & IT Services company based in Redditch. M-Tech sells and supports AMO, a comprehensive multi-channel ERP solution including e-Commerce websites.

AMO is an integrated suite of software which covers all aspects of running a business including Sales from multiple channels (web sites, eBay, Amazon etc.) Accounts, Stock Control, Warehousing, Marketing, Purchasing and integrates with a variety of 3rd party payments gateways, couriers etc. for seamless operation.

Our USP is working very closely with a relatively small number of retail clients in a range of market sectors as a true partner in their business helping them develop and grow through the use of our software & services.

The Job

To join our on-shore development teams (we also have an off-shore team based in Mumbai) which work in an agile environment across a range of clients & varied developments.

One current project in progress is to migrate our application to one which is browser based which opens up new development opportunities and the potential to add further value to the application.

Experience & Skills Required

- An experienced & confident Cache developer (including Cache Objects & ideally CSP)
- Good communications skills at all levels, including with clients
- Used to working in an Agile environment & multi-tasking
- Experience of ERP/CRM/Order management systems is beneficial
- Experience of SOAP API's would be an advantage
- Other web technologies such as JavaScript & HTML would be useful
